Welcome to Kennedy ABA.

Everything's about to get a whole lot better.

Welcome

You found your village.

Raising a child with autism takes a team. The right therapists, the right support, the right people at your side at every stage.

That's Kennedy ABA.

We know the road that brought you here wasn't easy. The waiting, the worrying, the wondering if you were doing enough. That changes now. From this moment on, you're not navigating this alone, you've got an entire Kennedy family behind you.

This guide walks you through every stage of your journey so you always know exactly where you are and what's coming next. And whenever you need us, we're one call away.

Let's do this. Together

Your Kennedy roadmap

1

Diagnosis

Your child has received an autism diagnosis. That's what brought you to us.

2

Intake

You reach out, we gather some basic info, and the Kennedy team gets to work.

3

Insurance authorization

We handle this entirely. No chasing, no confusion, just updates from us.

4

Initial assessment

A Kennedy BCBA meets your child and builds a real picture of who they are.

5

Submitting to insurance

We put everything together and send it in. You'll hear from us every step of the way.

6

Therapy begins

Your child is matched with a dedicated Kennedy therapist. Sessions start at home.

7

Six-month reassessment

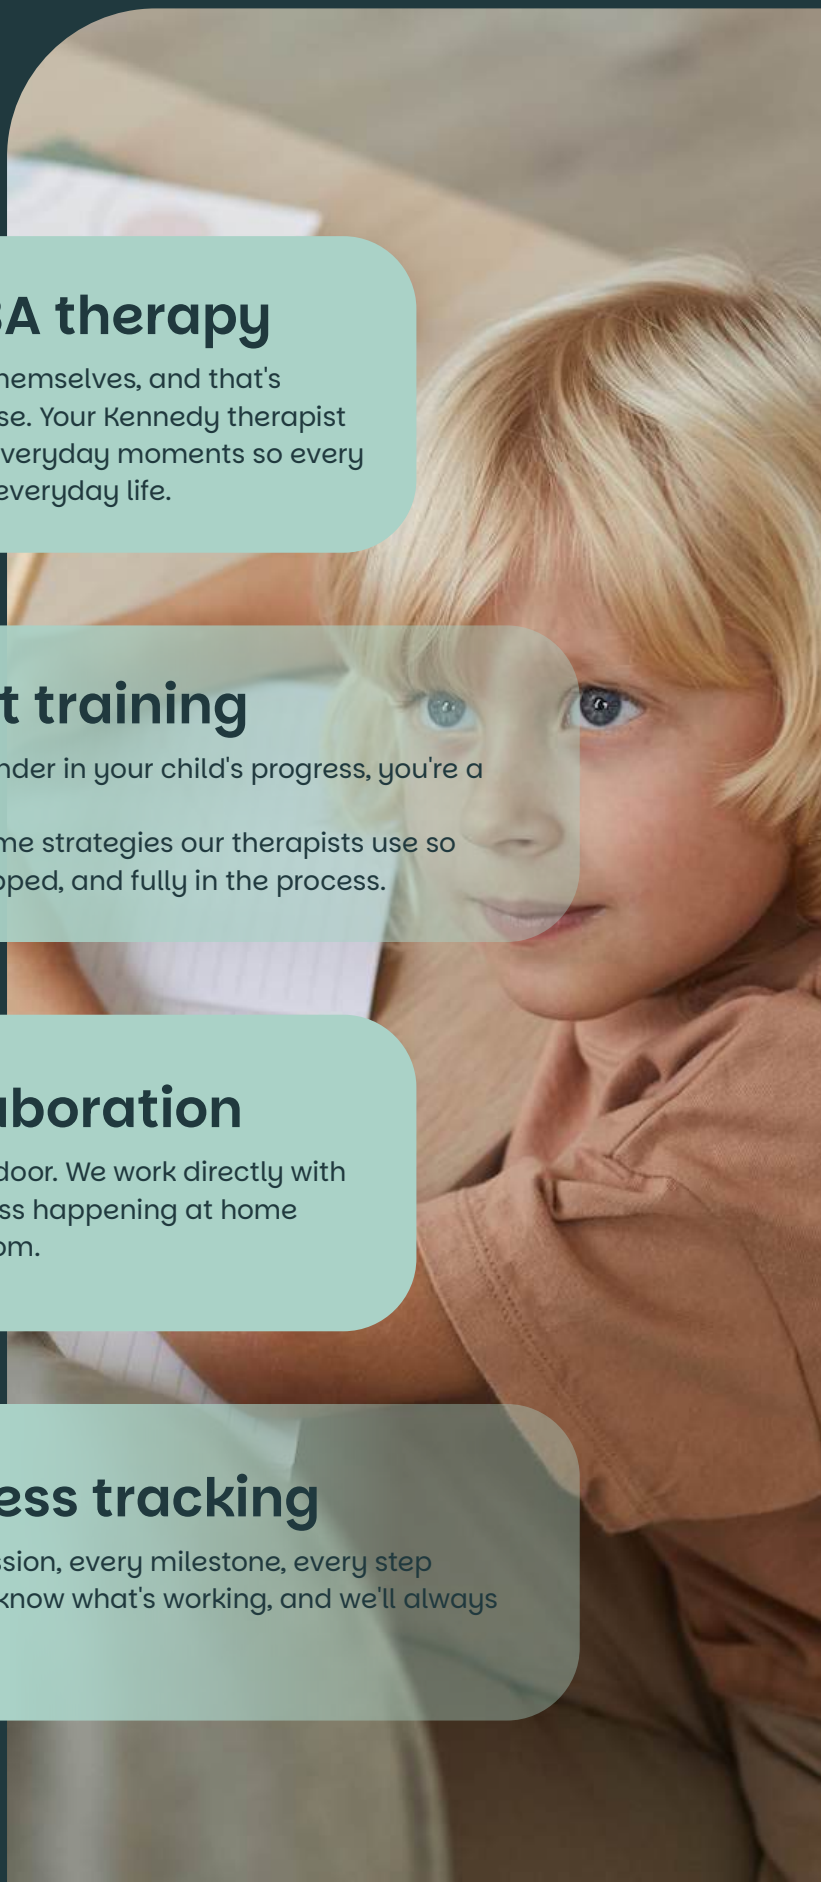

Every six months, your BCBA reviews progress and sharpens the plan.

8

Transition

When your child is ready to move on from therapy, Kennedy guides that process too.

The Kennedy scope

01 — In-home ABA therapy

Home is where your child is most themselves, and that's exactly where we bring our expertise. Your Kennedy therapist works through daily routines and everyday moments so every skill they build is one they'll use in everyday life.

02 — Parent training

You're not just a bystander in your child's progress, you're a driving force in it.
We train you in the same strategies our therapists use so you're confident, equipped, and fully in the process.

03 — School collaboration

Growth shouldn't stop at the front door. We work directly with your child's teachers so the progress happening at home follows them right into the classroom.

04 — Progress tracking

We measure every session, every milestone, every step forward. You'll always know what's working, and we'll always tell you why.

The Kennedy standard

No surprises.

We walk you through every step before it happens.

No cookie-cutterplans.

Every Kennedy therapy plan is built around your child specifically.

No insurance stress.

Our team handles authorizations and paperwork so you don't have to think about it.

Full transparency.

Every session, every data point, every decision, you hear about it. You're too important to be kept in the dark.

What happens next

Your Kennedy care coordinator will be in touch shortly to get intake started. From there, we'll handle insurance and get your BCBA assessment on the calendar.
